

The Acoustic Ones

Standard Converters

Standard converters 70 kHz / 35 kHz / 20 kHz

The standard converters are suitable for the operation in standard machines and special actuators.

- Designed for the assembly into ultrasonic welding machines and special purpose machines
- The ideal converter for every application thanks to a great range
- Heavy duty

Specification standard converters

Operating frequency:	C70-2:	70 kHz
	C35-10/C35-11/C35-12/C35-13:	35 kHz
	C20-10/C20-12:	20 kHz
Weight:	C70-2:	100 g
	C35-10/C35-11/C35-12/C35-13:	300 g
	C20-10/C20-12:	1.5 kg
Generator:	Suitable for all types of the relevant frequency	
Housing:	C70-2: Closed steel housing C35-10/C35-11: Closed steel housing C35-12/C35-13: Open steel housing C20-10: Closed steel housing C20-12: Open steel housing	
Maximum temperature:	50° C If used in continuous operation or with high temperatures, then air cooling should be used.	

Additional technical information available on request.
